Graphics & Animation Lessons Online

Craft your own figment of imagination

Parents whose children have an interest in Arts are well aware of ways to keep their child engaged and his or her creative juices flowing. Digital art in form of Graphics and Animation is a great medium for children who like to express themselves through painting, drawing and colouring. Graphics or animation can help them bring their imagination into a digital reality. And by now as we all know; Screen is the new Paper.

Why Graphics & Animation?

Graphics and Animation offer people various possibilities to express themselves uniquely. As we can see, Graphic Design and Animation is omnipresent. It can be found on your nearest traffic signal and also in all the PPTs that you make. From the logo of your favourite app to the logo of the Olympics is created with Graphics and Animation. In today's world, Animation has become an important tool to tell stories and communicate ideas as well as emotions. Animation has enabled us to share information in a simple way that can be understood by people across the ages. Animation, being an amalgamation of audio and visual has an edge over the written word.

About Grafikbees

GRAFIKBEEES is an initiative taken by four passionate creative individuals who have been part of graphics and animation design industry for over a decade. They have been working to impart education and knowledge to the youngsters who are willing to explore their creative side. aal

Our faculty members hail from some of the premier design institutes like National Institute of Design (NID), National Institute of Fashion Technology(NIFT), Government College of Art and Indian College of Art. These institutes have been producing exemplary talent in the field of Graphics and Animation for decades. Their experience and expertise will certainly be beneficial to shape up the creativity in children who are willing to be graphics and animation artists in future.

FAQ

1. – If your child is ready to develop his / her graphic design and animation skills, our courses are worth looking into. people are often introduced to graphic / animation design much later in life, for example, when they undertake a college course or when they need a logo created for a business or a product. It is then that they realize the importance of Graphics and animation. We think that it is an essential skill if your child wants to express in a better way.
2. Animation has an exceptional quality. It can enhance a learner's ability to express as well as comprehend. We experience it daily as we see our children learn things from

cartoons that they watch as well as the increasing use of animation in the educational videos. ex
